Lymphatic Technology Selection Guide

How to Decide on the Best Lymphatic System for Your Needs

**THIS LYMPHATIC
THERAPY INSTRUMENT
SELECTION GUIDE IS
DESIGNED TO HELP YOU
DECIDE ON THE BEST
ARCTURUS STAR SYSTEM
FOR YOUR NEEDS.**

Simply put, deciding on the right therapeutic lymphatic technology for your needs comes down to a few variables: Professional versus home use, therapeutic applications, stationary versus portability needs, lymphatic-focus only versus requirements to achieve alternate modalities with the same equipment, and budget.

Depending on the breadth and focus of your professional practice, this selection guide will assist you in making the best choice for your patients and clients. In this guide, you'll find FDA Class I approved lymphatic therapy instruments where labeled.

If you're not familiar with therapeutic lymphatic drainage technology, this guide can serve as a solid starting point on how to benefit your patient's outcomes as well as your practice bottom line.

If you need additional information, we provide free consultation and training on how to integrate lymphatic drainage technology into your practice, whether you are general physician, surgeon, chiropractor, physical therapist, sports therapist, massage therapist, veterinarian, or a licensed esthetician or medical professional.

About Arcturus Star

In 1998, the Arcturus Star Company was founded to explore the merits of electronic energy medicine for health and wellness. Engaging with serious illness provided Arcturus Star their passion for working with today's chronic health challenges and pioneered therapeutic technologies focused on the lymphatic system, a key component of the immune system. Over the past two decades, thousands of holistic practitioners and home users have contributed to the evolution of their technology. Arcturus Star features a wide array of lymphatic therapeutic devices. Our clients now include hospital lymphedema departments, integrative medical clinics, and clinical researchers worldwide.

About IRG

IRG is a highly trained and valued distributing partner of Arcturus Star with decades of experience with medical devices, information technologies, and technical support. We are very experienced in matching office and patient needs in conjunction with available budget to provide the best therapeutic lymphatic technology system for your practice. Advanced medical technologies push the boundaries of biology, physics and technology, enabling us to bring you the latest treatment protocols and the most up-to-date devices to treat your patients.

What is the lymphatic system?

The lymphatic system is a network of tissues, vessels and organs that work together to transport lymph, a colorless, watery fluid containing infection-fighting white blood cells, that helps rid the body of toxins, waste and other unwanted material.

Four key functions of the lymphatic system

The key functions of the lymphatic system include:

- 1. Maintaining fluid levels in your body:** The lymphatic system collects excess fluid that drains from cells and tissue throughout the body and returns it to the bloodstream, which is then recirculated throughout the body.
- 2. Absorbing fats from the digestive tract:** Lymph includes fluids from the intestines that contain fats and proteins and transports it back to the bloodstream.
- 3. Protecting against foreign invaders:** Part of the immune system, the lymphatic system produces and releases lymphocytes (white blood cells) and other immune cells that monitor and then destroy foreign invaders — such as bacteria, viruses, parasites and fungi — that may enter the body.
- 4. Transporting and removing waste products and abnormal cells from the lymph:** The lymphatic system helps rid the body of toxins, waste and other unwanted materials

Lymphedema

Fluid in the lymphatic system helps remove waste and toxins from the bodily tissues. A healthy, active lymphatic system uses the natural movements of smooth muscle tissue to achieve this.

However, surgery, medical conditions, or other damage can cause fluids to build up in the lymph system and lymph nodes, a condition known as lymphedema.

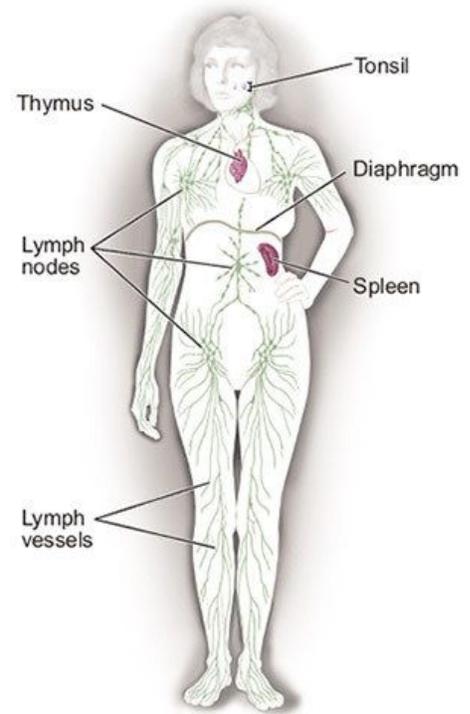

Manual lymph drainage (MLD)

Manual Lymph Drainage (MLD) is a technique developed by Dr. Emil Vodder and his wife Estrid in 1936 in Paris for treatment of swollen lymph nodes, to encourage the movement of lymph fluids throughout the body.

MLD is a light, skin-stretching massage that encourages the movement of lymph fluids around the body. MLD should not be confused with a traditional massage.

MLD is specifically focused on the lymph vessels to help the flow of lymphatic fluid. Therapy is applied to unaffected areas first, making it possible for the fluid to move out of the affected area, or “decongest” the region.

MLD helps open the remaining functioning lymph collectors and move protein and fluid into them, as well as to help speed up lymph fluid flow through the lymphatics.

Lymphatic system shown in image above.

Lymphatic Enhancement Technology (LET™)

LET is a system of electronic instrumentation that aids in improving microcirculation, general circulation, helps with fluid management at the tissue level. It supports or can replace manual lymphatic methods.

LET represents a comprehensive technological innovation in wellness and rehabilitation therapy, and includes the products, training seminars, and related research and academic studies of Arcturus Star.

LET Units offer several layers of electromagnetic energies that can assist with the release of interstitial toxins thus, helping with pain and acceleration of local healing. Also, a deeper view of the lymphatic system considers that the components of this body system also comprise the immune system. Thus, LET may assist the immune functions.

The LET Therapeutic System Accelerates Lymphatic Drainage For Tissue Detoxification Applications

- LET was created in 2006 by Arcturus Star Products and is a registered brand, which encompasses decades of product development and research utilizing vibrational energy technology.
- Arcturus Star has evolved a superior therapeutic instrument, with a proprietary circuit design, multiple applicators, optional modality upgrades and therapeutic techniques offered in our training programs.
- Developed over two decades of research in electronic therapies, LET is supported by practitioners from all sectors of the health industry. The therapy's success at optimizing lymphatic drainage is supported by academic study and clinical trials for lymphedema, post breast cancer treatments, among other applications.
- The enthusiasm of our clients and their patients offers confidence to integrative practitioners that this is the finest approach available today for improving lymphatic circulation and drainage for many applications.
- LET therapy is offered across the US, Canada and worldwide.

Professional Settings and Applications where LET™ is used

- Athletic Trainers
- Chiropractic
- Holistic Dentists
- Hospital Rehabilitation Centers
- Immune Syndromes
- Injury Rehabilitation
- Integrative Medical Clinics
- Integrative Oncology
- Lymphedema Therapy
- Manipulation Therapies
- Medical Aesthetics
- Massage Practices
- Naturopathic Clinics
- Occupational Therapy
- Physical Therapy
- Plastic Surgery
- Post Cancer Therapy
- Pre-/Post-Surgery
- Reconstruction Surgery
- Sports Medicine
- Stress Relief

How the techniques of LET™ help

LET is Acclaimed as Superior to Manual Lymphatic Drainage Alone. Used with manual techniques for comprehensive sessions or as local treatment, per your clients' needs and your professional focus. Clients love the therapy, see fast results and recommend it routinely. LET improves results and practice revenues.

People are taught the care of the cardiovascular system, but generally, not the lymphatic system or the immune system overall. LET fills a gap in the integrative communities for substantial treatments that assist with detoxification at a deep cellular level and work locally and to aid the immune functions.

Professionals and estheticians are drawn to LET because they are taught methods of manual lymph drainage, such as the Vodder method.

Occupational and Physical therapists help sufferers of post cancer edema, post surgeries and injuries and find LET an exceptional addition to their practices.

LET may be used with or without hands-on techniques. Manual techniques are applied as needed for palpation of tissue to assess congestion, increasing flow, and enhancing fluid release if these techniques fall within the therapist's scope of practice. Physical therapists, occupational therapists, massage therapists and registered nurses may apply manual therapies in conjunction with the application of LET instruments. Certified, trained lymphatic therapists may also apply some palpation and light skin – touch release techniques in conjunction with LET Instruments.

In our experience, massage therapists will start with the Lymphstar Pro while Clinician and Health Care providers will start with the Aria Elite or the Lymphstar Pro Fusion, while the Essence is reserved and prescribed for Home Users and/or used by therapists for domicile therapy delivery.

Technical information about LET™ instruments

The LET instruments from Arcturus Star incorporate a mild Electrostatic Energy Field (EEF) with Low Frequencies that are dynamically pulsed with our proprietary method.

EEF is a electro-static field that pulsates at microamperes (millionths of an ampere) at less than 1,000 Hz. The EF field is generated through medical grade glass applicators with the enclosed noble gases being excited by high voltage at the source and converted to DC (direct current). (Argon, Xenon, Krypton).

This creates physical vibrations with acoustic pressure waves at variable low frequencies. The oscillations are modulated by a proprietary design call Sweep Pulse/ Dynamic Wave Pulse (SP/DWP.) This wave pulse creates vibratory energy at the molecular level. This enables a release of toxins, excess ions, proteins etc. within the interstitial space.

Advanced models of LET instruments have additional electronic EM modalities that add important therapeutic benefits to the System: Multi-Chromatic, High Frequency Light Accessory (Eclipse) offers additional, local drainage effects; Pulsing Magnetic offers pulsed magnetic fields; Infrared Light therapy with ELF frequency modulates topical nutrients; Multi-Chromatic and Harmonic modulated lens with coherent light.

All Energies are Non-Thermal and safe for most persons. (See contraindications). The EEF works with the sympathetic contractile forces of the lymph circulation as shown in a scientific study for a description of this mechanism of action; the Croley Study performed by Thomas Eugene Croley, PhD. Emeritus professor, Anatomy, Texas Women's University.

Lymphatic Enhancement Technology Instruments are state of the art technology for application on broad range of tissue congestion-based problems. Enhances and augments the functions of the lymphatic system as the detoxification channel for the body. Proven effective over 3 decades of users all over the world.

Contraindications of LET

Do not use in the presence of unexplained calf pain, on patients with a pacemaker/ ICD (some medical exceptions can be made per company instructions); on patients with congestive heart failure or other serious cardiovascular conditions; directly over infection sites; on any woman who is pregnant or may be pregnant.

Company Certified Training is required for Use in Medical Facilities.

Do NOT Use within 30 feet of diagnostic equipment with oscilloscopes, such as EEG, EKG, EMG, etc., as low frequency emissions MAY interfere with diagnostic display readouts.

Important Points About Lymph Therapy

- The lymphatic system is vented out of the body through the kidneys, bowel, skin, and lungs. In contrast, the circulatory system is vented by the lymphatic system, with 10% of blood volume going into the lymph system at completion of each “circulation.” With this understanding, it is easy to understand the importance of optimized lymph flow to the health of the body in general (immune system), and to the healing of all injuries.

Some therapists find that use of Arcturus Star therapy heads on the patient/client’s skin in a sequence of addressing will give a very effective treatment.

1. First, the various lymph structures,
 2. Second, following lymphatic flow directions, and
 3. Third, focusing on a proximal area to an injury or major blockage,
- When performing the treatment, flow of the lymph fluids will be accentuated by the electrostatic energy for several hours following treatment.
 - Moderate physical activity and drinking of adequate water following the therapy will facilitate the movement of lymph and toxins.
 - Another help to complete drainage is for the patient/client to use a dry skin brushing technique following treatment.
 - Finally, moderate exercise such as walking, or biking is highly recommended. Rebounding on a mini-trampoline can greatly move the lymph. These techniques can either replace manual lymph massage or can amplify the positive affects when manual therapy is used.

Introduction to the PHIT™ System

PHIT is an acronym which stands for **Photo Harmonic Induction Therapy**, and is a proprietary term for a unique frequency delivery method from Arcturus Star. Arcturus Star offers several PHIT modalities ideal for various uses. There are currently four PHIT modalities that are offered.

The Four PHIT Modalities

There are four PHIT modalities currently offered. They are commonly referred to as “heads” as each modality is constructed as a corded end piece based on specific electronic components and operational features. The cord of the head is plugged into the Arcturus Star product.

1. Eclipse Multi-Chromatic Head™
2. Pulsing Magnetic Head™
3. Infrared Enhancer Head™ - with Bioresonance Vial Holder Attachment
4. The Crystal LymphWaves™ Hi-Intensity Photo Therapy

Arcturus Star Products that offer the PHIT System

PHIT technology comes standard in the master electronic circuitry for certain Arcturus Star products. This creates a cost-effective way to have a single operating unit in your practice space which consists of LET instrumentation as well as PHIT instrumentation. There is also a “stand-alone” PHIT modality product without LET instrumentation.

- Aria LET Elite System® (two PHIT ports)
- Lymphstar Pro Fusion® (two PHIT ports)
- PHIT Modality System® (for stand-alone use with PHIT Modality Heads, two PHIT ports)

Descriptions of Each of the Four PHIT Modalities

1. Eclipse Multi-Chromatic Head™

Anti-Aging (skin) & All-Purpose Energy Balancing Modality.

The Eclipse uses Light Emitting Diodes (LEDs) in the red, blue, and near infrared range for optimal wavelengths. A cluster of 26 red LEDs creates a powerful field of monochromatic light. It has an internal antenna that emits 4 specific high frequencies. Because it can be left on areas of the body or face while performing LET lymph work, it efficiently drives in these energies resulting in an amplified effect on the interstitial spaces (resulting in fluid reduction).

The Eclipse is the most popular PHIT modality for the Fusion product.

2. Pulsing Magnetic Head™

The use of pulsed magnetic fields facilitates healing in bone (hard tissues) and injuries of soft tissues, such as nerve, muscle, and tendons, and the pain from such injuries. Each tissue responds to a different frequency or pulsation of the wave form used.

This modality has 10 frequency settings and can be placed on any area of the body. Internal Magnetic coil is hand made in our factory. Many rehabilitation and pain applications.

The Full Line of Fusion PHIT Modalities, continued

3. Infrared Enhancer Head™ - with Bioresonance Vial Holder Attachment

The Infrared Enhancer works as intense near-infrared photon therapy into the skin. In addition, it emits an extremely low frequency that activates the lymphatic channels and drives in Arcturus Start skin care products, or any Transdermal creams used for pain, inflammation, skin, and so on.

The vial holder allows for experimentation in bioresonance therapy. For advanced Skin Care, Pain Relief, Muscle Strain, Naturopathic Applications of the use of the energetic signals of herbs, homeopathics, etc.

4. The Crystal LymphWaves™ Hi-Intensity Photo Therapy

“The Beautiful Light That Heals”

Low Level coherent light with LEDs in a unique lens configuration

The Crystal Lymph Waves is used for local treatment of injuries, wounds, and resistant fibrous tissue, including scars, cysts, lymph nodes as well as edema and other decongestive applications, and as advanced treatment for some types of pain.

It may also be used as a reflective treatment on acupuncture point and can be used with any zone therapy that utilizes the meridian system.

It is also very effective as a Photo Face-Lift when used over the acupoints. With its unique lens, it transfers highly complex informational fields to an area. Try it for acute and chronic pain, scars, injuries, wound healing, advancing lymphatic decongestion, accelerated healing and regeneration in skincare, and for animal applications such as equine rehabilitation for injuries.

Contraindications of PHIT

Do not use in the presence of unexplained calf pain, on patients with a pacemaker/ ICD (some medical exceptions can be made per company instructions); on patients with congestive heart failure or other serious cardiovascular conditions, directly over infection sites; on any woman who is pregnant or may be pregnant. Company Certified Training is required for Use in Medical Facilities.

Do NOT Use within 30 feet of diagnostic equipment with oscilloscopes, such as EEG, EKG, EMG, etc. as low frequency emissions MAY interfere with diagnostic display readouts.

ARCTURUS STAR

LYMPHATIC ENHANCEMENT TECHNOLOGY™

Efficacy of EEF

Arcturus Star products apply a mild Electrostatic Energy Field (EEF) with low frequencies that are dynamically pulsed using a proprietary method. EEF is an electro-static field that pulsates at microamperes (millionths of an ampere) at less than 1,000 Hz. The EF Field is generated through medical grade glass applicators with noble gases enclosed. (Argon, xenon, etc.). EEF:

- Creates physical vibrations with acoustic pressure waves at low frequencies of under 1,000 Hz.
- The oscillations used are a proprietary design call Sweep Pulse/ Dynamic Wave Pulse (SP/DWP.)
- This wave pulse creates vibratory energy at the molecular level.
- A Multi-Chromatic Light Accessory (Eclipse) offers additional, local drainage effects.
- All Energies are Non-thermal and safe for most persons. (see contraindications in this document)
- The EEF works with the sympathetic contractile forces of the lymph circulation as shown in a scientific study. A description of this mechanism of action is available in *The Croley Study* performed by Thomas Eugene Croley, PhD. Emeritus Professor of Anatomy.

Applications for Improved Lymphatic Drainage

- Breast Conditions
- Chronic Pain
- Immune Syndromes
- Pre/Post-Surgical
- Esthetics Procedures
- Injury Rehabilitation
- Sports Medicine
- Lymphedema Care
- Women's Health
- Stress Relief
- Post Cancer Therapies
- Manipulation Therapies

Enhancing lymphatic therapy instruments through PHIT

Two of the four Lymphatic Therapy Instruments featured in this guide can be enhanced and expanded in their application and modalities by connecting additional therapeutic instruments called

Photo Harmonic Induction Technology© (PHIT).

The following are the four PHIT modality heads that can be added to the Aria Elite and the Lymphstar Pro Fusion therapy instruments:

1. Crystal LymphWave Photonic Therapy Head.
2. Eclipse Multi-Chromatic Modality Head.
3. Pulsing Magnetic Modality Head.
4. Infrared Enhancer Modality Head.

Arcturus Star Therapeutic Lymphatic Technology Product List

Lymphstar Pro®

The Lymphstar Pro® LET Lymphatic Therapy Instrument is our exclusive innovation used by thousands of people worldwide. It is the original Lymphatic Enhancement Technology (LET) unit acclaimed for its benefits for over two decades. Many successful practices rely on offering LET therapy with the Lymphstar Pro for the benefit of their clients.

LET technology applies a unique combination of energetic modalities:

- 1) Physical vibration with low frequency sound waves
- 2) An electro-static energy field (EEF), and
- 3) Dynamic wave pulses (DWP) that create harmonics and additional pressure waves.

The lymphatic vessels resonate with these energies due as the nerves around lymph vessels are energized. The result is a profound release of excess fluid, toxins, excess ions and biofilms present within the tissues and organs drained by the lymph system.

This makes the Lymphatic Enhancement Technology Instruments much more effective than manual lymph therapy alone and a breakthrough for practitioners in multiple professions.

The Lymphstar Pro® is an FDA registered device. Classification Name **Massager, Therapeutic, Electric device, Product Code ISA, Device Class 1.**

Includes:

Base unit, 2 LET Heads with standard bulbs, soft carry bag, DVDs, power supply and User's Manual. Optional bulbs are available. Two-year warranty on the base unit and one-year warranty on the therapy heads.

- The latest upgrade to the Lymphstar Pro is the sleek, Nanuk exterior case with easy open latches.
- And the new, LET Heads (wands), designed with replaceable bulbs and optional treatment bulbs. These newly engineered treatment heads also provide an additional field of harmonic energy that adds to this phenomenal treatment system.

Arcturus Star Therapeutic Lymphatic Technology Product List, continued

Lymphstar Pro Fusion®

The Lymphstar Pro Fusion Instrument is the first product of its kind, as it combines our flagship product, the Lymphstar Pro LET Lymphatic Therapy Instrument with the PHIT Fusion System that supports different electromagnetic therapy modalities.

These modalities are called the Fusion - PHIT Modality Heads. This versatile Instrument has been our most popular product for professionals.

Arcturus Star engineered this double unit with a right side with 2 ports for plugging in the PHIT Modalities.

The left side of the unit is a Lymphstar Pro with the jacks and controls for the LET heads. (See the Lymphstar Pro summary above for more on the LET technology.)

The PHIT modalities are used along with the Lymphstar treatment portion or may be used separately. Purchase these separately to customize this system for your practice.

Currently there are four PHIT modalities. More options may be added in the future.

The Lymphstar Pro Fusion® is an FDA registered device. Classification Name Massager, Therapeutic, Electric device, Product Code ISA, Device Class 1.

Includes:

The unit price includes Lymphstar Pro Fusion base unit, 2 LET therapy heads, power supply, soft carry bag, DVDs, and User Guide & Manual. Optional bulbs are available.

Two-year warranty on the base unit and one-year warranty on the therapy heads.

Optional PHIT Modality Head Options:

1. Eclipse Multi-Chromatic Head™
2. Infrared Enhancer Head with Bio-Resonance Vial Cap
3. Pulsing Magnetic Head™
4. The Crystal LymphWaves™ Photo-Harmonic Low - Level Laser System

See PHIT Modality page for details on these modalities.

Arcturus Star Therapeutic Lymphatic Technology Product List, continued

Lymphstar Essence®

The Lymphstar Essence is our newest Lymphatic Enhancement Technology instrument. It joins the acclaimed Lymphstar Pro® unit in our Lymphstar Line as a lower -priced option allowing for more people to benefit from LET technology.

Designed for new lymphatic therapists, aesthetician, home users, and as a travel model, it has the same frequency circuits, adjustability, and power of the Lymphstar Pro model.

The Lymphstar Essence differs in that it has:

- A simpler frequency setting controller with a 3-position switch in place of 10 settings;
- The outside case is a lighter-duty enclosure and is smaller and weighs less; and
- It comes with the original design of therapy heads (wands), Standard Heads that hold non-replaceable bulbs.

You can order the LET Heads, with replaceable bulbs and optional bulbs, as an upgrade for an additional price.

The Lymphstar Essence® is an FDA registered device. Classification Name Massager, Therapeutic, Electric device, Product Code ISA, Device Class 1.

Includes:

Base Lymphstar Essence unit, 2 Standard Heads, soft carry bag, 2 instructional DVDs, power supply and user's manual.

Arcturus Star Therapeutic Lymphatic Technology Product List, continued

Lymphstar Heads, LET Heads, Bulb Styles, and Sets

The LET Heads: are our newest therapy heads for the Lymphstar Line of instruments. An innovative design gives you an economical option for replacing the bulbs if they are broken. Plus, there are other bulb styles available for focused treatments. The LET Heads produce an additional field of harmonic energy for more positive effects. LET heads come with all Lymphstar models except for the Essence model. Made of scientific Borosilicate glass and contains the noble gases, xenon, argon, and krypton. Plastic and assembly are the exclusive design of Arcturus Star and are fabricated by us. One-Year warranty on LET Heads. Bulbs are not warranted against breakage only manufacturers defects.

LET Base Handle: the holder for the bulbs without a bulb included. A spare handle is handy for busy practices in case of product damage or failure. An extra handle prevents costs for expedited shipping when you need one in a hurry. Also, it is nice to have the flat bulb or acupoint bulb ready for plugging into the unit when working on clients, as opposed to swapping out the bulbs and risking breakage. Plastic and assembly are the exclusive design of Arcturus Star and are fabricated in our factory. One - year warranty on the base handle.

Tri-Bulb Set in Case

There are 3 bulb styles for the LET Heads:

Standard Bulb: Largest bulb for use on the body and face. Disperses the energy in a broad area for covering large body areas efficiently.

Flat Bulb: Small bulb used as a focus of energy on the face, on scars, bruises, hematomas, discoloration, spider veins. Reports from PTs are that radiation discoloration and pain are helped.

Acupoint bulb: Small focused energy with extension for working on the facial acupuncture points and other acupoints, in ears, on discolorations, trigger points, with reflexology on the feet and hands.

Tri-Bulb Set: A set of the 3 styles of bulbs and a padded carry case for storage. Plus, a bulb - care kit.

Borosilicate glass and contains the noble gases, xenon, argon, and krypton. Plastic and assembly are the exclusive design of Arcturus Star and are fabricated by us. One-Year warranty on Bulbs. Bulbs are not warranted against breakage, only manufacturers defects.

The PHIT Modality System®

The PHIT Modality System is not a Lymphstar / LET unit. It is a stand-alone product for use with the PHIT Modality Heads. It performs just like the second half of the Lymphstar Pro Fusion and Aria LET Systems that both can host the PHIT modality Heads. A collection of 4 modalities is available in one convenient system, according to your needs. The entire system is user-friendly and designed to meet the needs of our customers in the various beauty & wellness professions.

Applications include:

- Advancing lymph drainage work in the tissues,
- Post procedure-surgical healing with magnetic fields,
- Low level laser acupuncture with intense phototherapy for scars and fibrotic conditions and skin (Crystal LymphWaves), pain conditions
- Infrared light and low frequency for enhancing transdermal creams, cosmeceuticals, herbal and more.

You can tailor the product to your individual needs and expand as your practice allows:

- Outstanding flexibility with a choice of mix-and-match modalities, all at economical pricing
- Quickly change modalities, use two of the same or 2 different therapies at once, or sequentially. Then change the modality heads in seconds for more applications.
- This versatility is unique in our industry

Includes:

Base unit, power supply, 2 Modalities except for Crystal LymphWaves (which may be purchased for an additional fee), User Guide.

Two-year warranty on the base unit and on the PHIT Modality heads.

PHIT Modality Head Options:

1. Eclipse Multi-Chromatic Head™
2. Infrared Enhancer Head with Bio-Resonance Vial Cap
3. Pulsing Magnetic Head™
4. The Crystal LymphWaves™ Photo-Harmonic Low - Level Laser System

See next page for details on each PHIT modality option listed above.

PHIT Head Summary

These are the four PHIT modalities that are available:

1. Eclipse Multi-Chromatic Head™
2. Infrared Enhancer Head with Bio-Resonance Vial Cap
3. Pulsing Magnetic Head™
4. The Crystal LymphWaves™ Photo-Harmonic Low - Level Laser System

Which devices can the PHIT Heads be used with?

The Fusion PHIT® Modality Heads are to be used with any one of “PHIT Compatible Systems”, which includes these devices:

- The Lymphstar Pro Fusion (LET system with PHIT compatibility)
- The Lymphstar Pro® (LET system with PHIT compatibility)
- The Aria LET System (LET system with PHIT compatibility)
- PHIT Modality Base Unit (PHIT only system)

The PHIT Modality Heads are our exclusive technology designed to support and amplify the effectiveness of Lymphatic Enhancement Technology – LET. PHIT can also be used as stand-alone treatments as well, for many applications.

Please see the individual PHIT Modalities below for details. Enjoy the ability to clear more pain, congestion, symptoms and offer superior skincare with the PHIT modalities.

Arcturus Star Therapeutic Lymphatic Technology Product List, continued

Eclipse Multi-Chromatic Head™

This is the most popular and essential of the PHIT Modality Heads for LET therapy. The Eclipse offers a unique combination of technologies derived from the electro-magnetic spectrum. Photonic Therapy is the next revolution in the holistic health and beauty fields. In addition, High Frequencies with Harmonics have been used in health applications in many different forms. Our PHIT system for pulsing frequencies uses 3 different high frequencies with high harmonics. These are extremely low energy in the RF range. Living systems can tune into these and utilize beneficial harmonics automatically.

By leaving it in areas that have been prepared with the Lymphstar, you can treat problems where edema is visible, scar tissue areas, over organs, etc. that need attention for 5 – 15 minutes. Think of it as a hammer, able to push out what needs clearing. The client will feel a sense of calm and wellbeing, and you will be able to make more progress in one session.

The result can be pain relief, increased healing, and improving overall functioning. This can mean help for occasional and chronic suffering from over-activity, illness, injury, stress and chronic health conditions. Fibrocystic breast problems respond extremely well to the Crystal LymphWaves. New surgeries, injuries, aggressive facial procedures, liposuction are also highly recommended for positive benefits with this unique modality.

“This multi-chromatic light modality is a multi-tasking piece head that reaches well beyond just the lymph system and the immediate area worked. The specific light frequencies help to reduce congestion and discomfort in the tissue and joint spaces, as well as balancing hormone production throughout the body. The high frequency antennae used in the Eclipse help to accelerate its work, making the use of the Lymphstar modality much more efficient.”

How It Works

- The Eclipse Head uses Light Emitting Diodes (LEDs) in the red, blue, and near infrared range for a broad band of coverage from the light spectrum.
- In addition to the lights, it emits 4 specific high frequencies. These do not emit audible sounds, but they are “heard” at the cellular level, bringing them into balance. These frequencies work along with the light waves to provide more frequency “information” to the cells.
- Finally, a unique, hi-intensity cluster of red LEDs creates a powerful field of monochromatic light used for applying directly into the local area being treated. This red wavelength is also known for its effectiveness on the skin and subdermal tissues. The near infrared LEDs increase circulation and pain relief.

Specifications

LIGHT = 24 diode red LED cluster, 650 -660 nm; 6 Blue LEDs at 430nm, 6 near infrared LEDs at 940nm.

Arcturus Star Therapeutic Lymphatic Technology Product List, continued

Pulsing Magnetic Field PHIT Head™

In the 1960's research began to take magnetic fields and therapy seriously and there was renewed interest the use of electric and magnetic fields to facilitate healing in bone (hard tissues). Attention turned to injuries of soft tissues, such as nerve, muscle, and tendons, and the pain from such injuries.

Magnetic fields have some advantages over electric fields, and can be used for treating both soft and hard tissues simultaneously. Each tissue responds to a different frequency or pulsation of the wave form used.

Effects of pulsed magnetic fields for injury rehabilitation are:

- Enhancement of capillary formation
- Decreased necrosis
- Reduced swelling
- Diminished pain
- Faster and functional recovery
- Reduction and depth, area, and pain in skin and wounds
- Reduced muscle loss after ligament surgery
- Increased tensile strength of ligaments
- Accelerations of nerve regeneration and functional recovery

The data listed above is referenced in the book, **Energy Medicine, the Scientific Basis** by James Oschman.

“Used to address non-vascular and low-vascular tissue, the Pulsing Magnetic Head addresses discomfort and issues with ligaments, tendons, fascia and bone. The client will feel a loosening or ebbing of discomfort in those areas, especially when paired with visible light therapy from the Eclipse or Crystal LymphWaves. Often, orthopedic issues can cause structural restriction, which makes this modality a very useful tool to go after stiffness, discomfort, and adhesive scar tissue from injuries or surgeries as well as improving lymphatic flow around the affected area to speed healing.” - Pulsing Magnetic Field PHIT Head User

Infrared Enhancer Head with Bio-Resonance Cap™

For advanced Skin Care, Pain Relief, Muscle Strain, and More. The Infrared Enhancer works great as photo - Therapy Alone PLUS it performs frequency activation of our skin care products along with other transdermal nutrient creams. The Infrared Enhancer Head has been engineered to enhance your wellness and beauty needs for many years to come. It is designed to stimulate cellular energy with an extremely low frequency, including the enhancement of applied topical nutrition. It uses infrared light energy. The Infrared Enhancer Head has a customized light array that contains 8 infrared LEDs (light emitting diodes) and one red LED that creates the red light you can see. The near infrared apply intense photon therapy into the skin. The human eye cannot see infrared, so the other LEDs will not appear to light up. The Infrared Enhancer Head Pulses at low frequencies researched for their benefits in opening lymph channels moving topical nutrition into the dermis. The unit may be used without creams, too, for general purposes. Raw skin or minor injuries may be addressed, too, with just the light. It is highly effective by itself but is designed to open pores with vibrational energy and allow molecules in transdermal creams to enter the dermis. The vial holder allows for experimentation in bio-resonance therapy. For advanced Skin Care, Pain Relief, Muscle Strain, Naturopathic Applications of the use of the energetic signals of herbs, homeopathics, etc. While using, hold the LIGHT ARRAY about one inch above the skin. You may safely touch the skin occasionally while using it. Run the head in a circular motion while using (one to five minutes per area). You can place the IR Enhancer flat against an area of concern for 1 minute (crow's feet, blemishes, acne, wrinkles, smile lines, the neck, etc.) Use over joints and muscles after exertion is desirable. Hold over the area for one to three rounds for relief. The healing energy will work on the area over night for improvements, too, if immediate relief wears off in an hour. Repeat often for injuries. Animals, too, may require only one to two rounds of 4 minutes of use. Try it for injuries, chronic pain, or other nutritional cream protocols. One report says that horses prefer the lights to be 12 inches away

"This amazing modality uses near infrared and low-level sound waves to amplify the resonant frequency of any substance you choose to work with, allowing the client to reap the benefit of that substance without ingesting it or using it topically. This can be used for very sensitive people, people with allergies, and with expensive or hard to find substances, or to amplify a substance already on the skin to make it even more effective. This modality can also be used to "charge" crystals, oils, and any other tools the practitioner uses as a way to enhance their properties or clear

Arcturus Star Therapeutic Lymphatic Technology Product List, continued

Crystal Lymphwaves High-Intensity Photo Therapy Head™

The Only Phototherapy Using Coherent Light (Low Level Laser) and Non-Coherent Light (LED) Simultaneously, within a Unique Lens, Modulated by Harmonic Frequencies

Acute and Chronic Pain | Scar Tissue | Accelerated Healing & Regeneration for Injuries, Surgeries, & Wound Healing | Fibrocystic Breasts | Facial Procedures | Post Dental Procedures

With its unique lens, it transfers highly complex information fields to an area.

Our newest therapeutic instrument, the Crystal LymphWaves HI-Intensity Photo Therapy Head is the latest in an evolution of unique light technologies designed by Arcturus Star Products. The Crystal LymphWaves has been engineered to provide the most advanced features available in the field of photo-biology and vibrational energy technology. It combines the use of coherent, multi-chromatic non-coherent light (LEDs), and a patented delivery system that is like no other.

Add a powerful tool to your practice that will expand your therapeutic success!

The CLW is used for “local treatment” for injuries, wounds, and resistant fibrous tissue, including scars, cysts, lymph nodes as well as edema and other decongestive applications; and as advanced treatment for pain management. It may also be used as a “reflective” treatment on acupuncture points. Use it with any zone therapy that utilizes the meridian system. It is also very effective as a Photo Face - Lift when used over the acupoints of the face and neck. Try it for acute and chronic pain, scars, injuries, wound healing, advancing lymphatic decongestion, accelerated healing and regeneration in skincare, and for animal applications such as equine rehabilitation for injuries.

When combined with LET Lymphatic drainage prior to treatment, it provides the world’s most complete Photo-Biological Healing Technology..

“This cold laser/harmonic light uses incoherent light frequencies in red, blue, and white and low-level sound waves to address deepseated concerns such as internal adhesive scar tissue, lipomas, infections, and non-cancerous cysts, as well as heavily congested lymphatic regions. The light emitted can be aimed and adjusted to achieve specific depths into the tissue to address these concerns in a gentle but very effective way. The client may feel some subtle pressure during the session, and energized afterwards.”

Gemini Photo-Harmonic Detox Bath

The Gemini Detox Bath™ is a therapeutic instrument used for cleansing the internal tissues body and inducing energetic balance through a water bath for the feet. And its transmission heads are designed to use without the water bath for light therapy directly on the body! The stimulation technology in the Gemini provides a DC electrical field that has been found to be beneficial for nourishing the living energy field.

Where electrical energy is blocked in the meridian system, the flow of healthy energy is stopped. When using the Gemini, these pathways are recharged and opened. Next, cells are oxygenated for accelerated cellular respiration. And finally, toxins are released into the lymph system and are electro-magnetically attracted to the soles of the feet and into the water. Tissues and organs are cleansed through this process, improving overall health.

Empirical observations suggest that heavy metal toxins in the tissues and organs are recharged and released through the lymphatic system within this process. This is NOT an ionic footbath, but a profound light, sound and galvanic field therapy unit that works on acupuncture points and meridians through light and sound in addition to mild electrostimulation.

Two-year warranty on the base unit and one year on the therapy heads.

Gem-Sonic Sound Therapy Pad

Arcturus Star has innovated the Lymphatic Enhancement Therapy Instruments that are prized by holistic practitioners worldwide. The Gem-Sonic Sound Therapy Pad is our newest product for enhancing health and well-being. Now you can release blockages, stimulate fluid release and reboot healing energy in various organs and systems with Vibrational Energy. It is simple to use and can be incorporated into your overall healing regimen very easily. Through physics we learn that Sound and Vibration is the source of all physical things. Humans have used sound and vibration to heal and soothe the body and mind since ancient days. The frequencies in the Gem-Sonic Energy Balancer Pad are very low frequencies and range from 70 Hz to around 4700 Hz. Many of these have been researched for 40 years. Others come from historical frequency research going back to 1900. The unit includes the Gem-Sonic Box and padded sound emitter, power supply, and User's Guide.

Two Year warranty on unit, 1 year on emitter pad.

The Peacemaker™

The Peacemaker provides an Harmonic Energy Field that is calming and balancing. You may feel less stressed and have fewer aches and pains.

It makes your surroundings feel less chaotic to the brain and body and may protect cellular activity from the electromagnetic pollution and other subtle energetic disturbances surrounding us today. Reports include disappearance of mysterious pains, better sleep, and calmer energy in the home, treatment spaces and offices. Most disharmonic energy is in the brain-wave range and the Peacemaker allows your body and brain to entrain to its harmonic frequencies and not engage with the disharmony. Feng Shui experts applaud this product. Simply the best and most

People love it, plants will thrive in its energy...pets too! Just plug it in to a wall outlet and the harmonizing field covers a radius of 35 feet or a diameter of 70 feet. Demonstrate and hear its energy on an analog radio. No other product of this kind has a detectable output. This energy goes through walls to cover the desired area but performs best closer to the unit itself. Families place 2 -3 units in the home depending upon the size. For a technical description, see our promo on the website or request an email. Therapists place one near the treatment table to relax their clients AND themselves.

Blue-Radiance™

FACIAL REVITALIZATION SYSTEM & LIGHT THERAPY TOOL

- Arcturus Star Products developed the Blue Radiance in 1998. Our goal, as always, is to provide technology that is effective, safe, and healing, in a quality package. Not just a facial muscle toner or photo-facial, it is all of this and more. It provides Harmonics and higher frequencies to give you a Radiant complexion, tighter muscles, and even heal skin problems. It provides a firming effect on facial muscles and increases circulation for skin rejuvenation. And, it can be applied anywhere on the body to accelerate healing. People have taken it on trips and used it for sprained ankles, sore knees, backs and even tummy upsets!

It is a first-aid kit for travelers, in addition to making you look better.

This vibrational energy product is designed by Arcturus Star for your enjoyment and may be used by professionals. Recommended use is to apply daily for 2 weeks followed by weekly maintenance. See the glow in one treatment. The kit includes a hanging bag with pockets for each component. The Blue Radiance, a 9-volt battery, a serum for conduction of the micro-current, (Collagen Peptide with Snow Algae); improves the skin upon the first use and with continued uses. Also included is a spray bottle for wetting the gel to make it last longer, a user's guide and manual and a lovely, segmented organizer bag that is travel ready. Two-year warranty on the unit. We guarantee that you will love the Blue Radiance! Gel can be reordered.

Trek Phototherapy Plus Infrared Stimulator

The TREK is an affordable light and frequency therapy product for pain relief, enhancing your effectiveness with LET clients, and is an anti-aging therapy to add to your lymph treatments. The TREK provides 2 modalities: extremely low frequency and 2 wavelengths of light in one small portable product. Use for minor injuries or wounds, muscle strain and chronic pain along with our therapy creams.

Another benefit is for the brain! The frequency used in the TREK is one within the gamma wave range of our brain frequencies. Try it for mental health and vitality!

The TREK is excellent for pets and horses, too. The TREK Rechargeable battery, charger, user guide and a 2 – year warranty.

ARCTURUS STAR

LYMPHATIC ENHANCEMENT TECHNOLOGY™

Clinically tested, scientifically sound treatment guidelines and support

With an Arcturus Star product, you have access to knowledge and experience that increases your ability and capabilities to evoke a healing response that you and your patients and clients demand, desire, and expect. We excel in providing clinical support to maximize your office applications and treatment outcomes.

We provide free consultation to assist you in selecting which model is best for your needs and practice. In addition, we provide extensive training and advise on how to integrate lymphatic enhancement technology into your practice.

Support is provided in webinars, videos, PowerPoint presentations, eBooks, email and telephone support, as well as teleconferencing through Zoom, FaceTime and Skype.

Support and Training

- Training packages are available for on-site start-up training at your clinic, hospital or integrative center. Please call for quotes on sending a trainer in the US and Canada.
- We also offer online classes for the Arcturus Star products, and Master Class Seminars for advancing knowledge and proficiency at several US locations, and Skype training with a master trainer. The system comes with start-up materials and videos. We highly recommend that your therapist continue to study with our outstanding program.
- We believe a well-educated, highly informed practitioner is our best customer.

Revenue scenarios

The biggest question facing every Medical Doctor, Podiatrist, Chiropractor, and Physical Therapist is the same: Will I make enough revenue to justify my investment in an Arcturus Star LET / PHIT product?

There are potentially multiple streams of revenue possible depending on which treatments your office desires to perform. In addition to creating a new revenue stream based on lymphatic enhancement services, **an Arcturus Star product can also be used as a tool to enhance patient outcomes as an adjunct to your current services.** You can optimize patient outcomes by combining lymphatic drainage with physical therapy and other treatments to reduce pain, restore range of motion, and quicken the healing process. More clinicians are integrating lymphatic therapy into their practices as a growing number of patients seek alternatives to traditional treatments for pain and inflammation.

Your Arcturus Star product can pay for itself within 8-12 months

We have developed two revenue tables below, derived from input by those who have successfully built lymphatic therapy into their practice. Depending on geographical area and patient base, the range for a single session for lymphatic massage therapy ranges between \$40 and \$300. The revenue tables shown below are based on a scale of \$120 to \$250 per 20-minute session.

Based on our conservative estimates and data reported by our customer base, an Arcturus Star product pays for itself within 8 to 12 months. Therefore, adding a lymphatic drainage therapy system to your practice now can be a valuable investment in the health of your patients and in your practice's bottom line.

REVENUE - MONTHLY

Example for 1 month (4 weeks)

Average Charge	\$120	\$150	\$200	\$250
5 patients x 4 sessions	\$2,400	\$3,000	\$4,000	\$5,000
10 patients x 4 sessions	\$4,800	\$6,000	\$8,000	\$10,000
15 patients x 4 sessions	\$7,200	\$9,000	\$12,000	\$15,000
20 patients x 4 sessions	\$9,600	\$12,000	\$16,000	\$20,000

Your Arcturus Star device can create revenue from day one. Assumptions: 4 weeks' vacation each year and 48 weeks per year work. During those weeks, you will see your normal load of patients. Among those patients will be ones you or your staff will treat with the Arcturus Star product.

REVENUE - ANNUALLY

Example for 1 year (48 weeks)

Average Charge	\$120	\$150	\$200	\$250
5 patients x 48 sessions	\$28,800	\$36,000	\$48,000	\$60,000
10 patients x 48 sessions	\$57,600	\$72,000	\$96,000	\$120,000
15 patients x 48 sessions	\$86,400	\$108,000	\$144,000	\$180,000
20 patients x 48 sessions	\$115,200	\$144,000	\$192,000	\$240,000

Customer Feedback

The following quotations have been written by health care professionals and patients who have used the Aria LET and are reproduced for reference purposes only. Arcturus Star Products expresses no opinion or claims with regard to representations made herein.

"In support of the Aria LET technology, Holy Redeemer Health System is in the process of implementing an investigational study "Advances in Lymphedema Therapy" using the Aria LET in the treatment of lymphedema and in the prevention of lymphedema compared to conventional MLD (Manual Lymphatic Drainage). We have been quite impressed with individual results using the device and therefore have chosen to proceed with a clinical trial to establish prospective randomized evidence."

– Beth DuPree MD, FACS, Medical Director Breast Health Program Holy Redeemer Hospital, Southampton, PA

"I was interested to find ways to move fluid through the breast tissue, thinking it could help in preventing cancer. If you move the fluid out, you also move the hormones out. We have also seen good outcomes in women with painful fibrocystic breasts. They feel so much better after treatment, and the breasts are softer, smaller, and less cystic."

– Nita Desai MD, East West Integrative Medicine, Louisville, CO

"As you know, after a C-section and double hernia surgery, I developed severe scarring in my lower abdominal area. The scarring formed a mass which caused blockage in my intestines. I received numerous pain injections which did not help. Then countless physical therapy sessions which included ultrasound. This also provided no relief...the scarring got worse and I did not receive relief until I visited you. When you used the Aria LET on my abdominal area, I finally felt relief. The machine broke up the scar tissue enough that the blockage became relieved. After several treatments, I felt great relief from my pain and intestinal problems. Thank you for the Lymphatic therapy which made this chronic situation far more tolerable."

– Elizabeth Case, (Patient) CO

"I have a Primary Care Internal Medicine/Integrative Medicine Practice. I have been providing LET therapy to patients since 2011. We have had considerable success in applying LET therapy to people with a wide variety of problems. It is important to note that it does not treat a disease or diagnostic code. It reduces tissue congestion and normalizes autonomic nervous system function more effectively and more consistently than any other modality I have used in my 40 years of practice. As a result, my patients have noted benefit in improved sleep, reduced anxiety, and improved neuro-psych, respiratory, gastrointestinal, genitourinary and musculoskeletal function. It is not a panacea but it is an important therapeutic modality in my Integrative Medicine Practice."

– Warren Ross, MD, Crossroads Medical, Ellicott City, Maryland
